GARAGE CAPACITY	150 cars or 125 cars plus 6 buses

- ✔ Speedrunner II is a friendly vessel for people with Kinetic or other disabilities.

## SAFETY

In the sphere of security, Speedrunner II follows the national and international security regulations.

The security of our passengers is the main concern for every initiative and decision we make.

Every intervention on the boat aims at the improvement of the vessel's high standard security system.

Company's and vessel's employees are constantly trained with the highest training standards.

The boat per se has been designed in such a way so as for the crew to be effective in such conditions.

Speedrunner II is equipped with the finest navigational systems as well as with the most modern safety equipment.

The ship's crew constantly inspects the common areas of the boat , its communications systems, the garage as well as the fire protection systems.

The vessel's security systems are doublechecked by specialized technicians when passengers embark or disembark the ship, checking from the start, everything, regardless the crew's prior inspections. All material used for the vessel's construction are fireproof and recyclable.
